V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims	1 - 25	YES
	Claims		NO
Inventive step (IS)	Claims	5 - 9, 15 - 25	YES
	Claims	1 - 4, 10 - 14	NO

	Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: JP 7-106640 A

D2: US 5260851 A

D3: US 5661978 A

Claims 1-25 relate to a heat exchange unit including an apparatus to remove condensed water by allowing the condensed water gathered on a cooling fin part of the heat exchange unit to be evaporated to the air within the heat exchange unit itself.

D1 relates to a thermoelectric cooling unit which cools a control board for a computer incorporating a heat source efficiently. D2 relates to a housing for a computer power supply unit. D3 relates to a medical dispensing drawer having a thermoelectric device.

1. Novelty

Claims 1-25 relate to a heat exchange unit including an apparatus to remove condensed water, having a thermoelectric element between a hot sink and a cool sink. Such a thermoelectric element is not shown in D1-D3. Therefore, the subject matter of claims 1-25 is considered to be novel under PCT Article 33(2).

2. Inventive Step

2.1. Claims 1-4 and 10-14

The subject matter of claims 1-4 and 10-14 is considered to lack an inventive step under PCT Article 33(3) for the following reasons:

- Claims 1-4 relate to a heat exchange unit comprising a hot sink, a cool sink, and a thermoelectric element, and a heat exchange unit having a condensed water evaporating means made of a capillary fiber. It would be obvious to a person skilled in the art to derive said heat exchange units claimed in claims 1-4 from the thermoelectric cooling unit comprising a thermoelectric cooling machine and continuous foam sponge shown in the description and Figs. 1 and 2 of D1.

- Claims 10-14 relate to a heat exchange unit comprising a hot sink, a cool sink and a thermoelectric element, and a heat exchange unit comprising a condensed water-evaporating means made of a capillary fiber and a power supplying unit. Said heat exchange units of claims 10-14 are a mere combination of the technical features of the computer power supply units of D1 and D2.

2.2. Claims 5-9 and 15-25

The subject matter of claims 5-9 and 15-25 is considered to involve an inventive step under PCT Article 33(3) since the inventive step of said claims is not denied by the combination of said documents.

3. Industrial Applicability

Since claims 1-25 relate to a heat exchange unit including an apparatus to remove condensed water, the subject matter of said claims is considered to be industrially applicable under PCT Article 33(4).
